SUMMARY

Tech Lead with **9+ years** of experience specializing in AI applications and full-stack development. Key achievements include:

- **Led** ideation and delivery of a new AI Agent product, increasing user retention and adoption.
- **Designed** an in-house JIRA alternative that cut licensing costs by **~\$1,000/month**.
- **Enhanced** code quality by **25%** through Test-Driven Development practices.

WORK EXPERIENCE

Synup | Bengaluru, Karnataka, India

Tech Lead | June 2026 – Present | **Senior Software Engineer** | Oct 2022 – May 2026 | **Software Engineer** | May 2021 – Oct 2022

- **Delivered** an AI Agent product using RAG and SQL Vector DB, reducing token bloat by **80%** and enabling intuitive Slack channel interaction.
- **Mentored 4** junior engineers into full-time employees, fostering a high-performance team.
- **Spearheaded** company-wide rollout of a custom JIRA replacement, saving licensing costs by **\$1,000** per month.
- **Engineered** a native MCP server with Claude Code, saving **2-4 hours** weekly per engineer within a **20-person** team through streamlined ticket management.
- **Managed** daily huddles by implementing automated ticket tracking and progress visualization tools, chopping weekly meeting times by **3 hours**.
- **Standardized** UI components with a private NPM package and Storybook, improving UX predictability and bringing down customer churn by **15%**.
- **Optimized** Python FastAPI services and PostgreSQL schemas for AI modules, cutting CI build duration by **15%** and lowering page response time by **10%**.
- **Designed** and implemented social media sharing features that fostered viral growth, contributing to a **10%** expansion in company revenue.
- **Led** a team of 4 developers to complete **50 CRM integrations** and design a unified email-parsing suite, processing over **2 million** mailbox messages monthly.
- **Architected** and launched custom software solutions for over **10 clients**, exceeding all project milestones with an impressive accuracy rate of over **98%**.
- **Established** TDD as a standard SDLC practice, which resulted in an **18%** reduction in post-release defects and improved code quality.

Senseforth.ai | Bengaluru, India **Software Engineer** | June 2020 – May 2021

- **Collaborated** on a conversational chatbot platform for the BFSI domain, upgrading NLP accuracy by **15%** and streamlining customer interactions.
- **Forged** a robust mini-framework for marketing emails, directly promoting development efficiency and decreasing email-template creation workload by **30%** for immediate team deployment.
- **Elevated** client project outcomes by owning design, development, and communication that drove **5%** revenue growth.

Compile Inc. | Bengaluru, Karnataka **Software Developer** | April 2020 – June 2020

- **Orchestrated** the development of an interactive data visualization frontend within the life sciences sector, achieving a **20%** uplift in user adoption.

Drivezy | Bengaluru, India **Application Developer** | March 2020 – April 2020

- **Championed** the enhancement of a B2C vehicle rental platform's backend infrastructure, refining image load capabilities and attaining a notable **50%** speed improvement.

Impact Analytics | Bengaluru, India **Software Engineer** | January 2019 – March 2020

- **Integrated** Data Science models into a **Node.js/PostgreSQL** backend for **Retail Allocation**, boosting data consistency and user experience by **22%**.
- **Won** an internal hackathon award for developing the most realistic solution out of **15** submitted projects.

Tata Consultancy Services | Indore, India **Assistant Systems Engineer** | July 2017 – January 2019

- **Engineered and delivered** 5+ critical Java/Spring Boot modules on schedule, migrating customer applications from legacy to modern tech stacks.
- **Directed** a 3-person team to **win 1st prize** in a business unit hackathon for AWS microservices development.

PROJECTS

- **claix**: <https://github.com/sayantanghosh-in/claix>
TUI to search, organize, and resume Claude Code sessions across all projects from a single terminal interface.
- **swale**: <https://github.com/sayantanghosh-in/swale>
Multi-interface developer life assistant unifying GitHub PRs, notes, TODOs, and personal expenses.

SKILLS

- **AI:** Claude Code, Cursor, Anthropic, OpenAI, Ollama, Qwen, Kimi, RAG, Vector DB
- **Languages & Frameworks:** React.js, Typescript, Next.js, Express, [Node.js](https://nodejs.org/), FastAPI, Python, GraphQL, REST API, HTML, CSS, Javascript
- **Infra:** Vercel, Railway, Runpod, Supabase, AWS, CI/CD, Jenkins, Docker, Kubernetes
- **Databases:** PostgreSQL, Supabase, MongoDB, Redis, Elasticsearch, Kafka
- **Testing & UI Dev Tools:** React Testing Library (RTL), Jest, Vitest, Playright, jest-axe, Storybook, Webpack, Rollup, Vite
- **Security:** CSP, CORS, XSS, CSRF, WAF, RCE
- **Other:** Data Structures and Algorithms, System Design, Accessibility (WCAG), Git

CERTIFICATIONS

- **Google Prompting Essentials** - <https://www.coursera.org/account/accomplishments/specialization/certificate/9YBPRFU8QGFR>
- **Ongoing:** Executive Post Graduate Certification in “**AI Native Software Engineering**” from IIT Kharagpur

EDUCATION

MCKV Institute of Engineering | B.Tech in CSE | 2013 – 2017 | DGPA: 8.06
